

MARAJ HOSSAIN

iOS Software Engineer — Swift, SwiftUI & UIKit

Dhaka, Bangladesh • +880 1731512087 • maraj9hossain@gmail.com • marajhossaincse.github.io

PROFESSIONAL SUMMARY

iOS Software Engineer with 4+ years of hands-on experience building native applications in Swift, SwiftUI, and UIKit, from architecture through to App Store release. Well-versed in MVC, MVVM, and Clean Architecture, with strong RESTful API development and integration experience across real-time communication, push notification, and backend systems. Comfortable owning the full app lifecycle — coding, debugging, Git-based collaboration, and App Store Guidelines compliance — and actively adopting an AI-driven workflow with Claude Code and MCP to accelerate delivery. A confident English communicator (C2), a strong team player, and always keen to take on challenging technical problems.

TECHNICAL SKILLS

Languages: Swift

Architecture & Design Patterns: MVC, MVVM, Clean Architecture

API & Data: RESTful APIs, JSON, API testing (Postman, Hoppscotch), secure authentication, SSL pinning

iOS Frameworks & Tools: SwiftUI, UIKit, Xcode, Xcode Schemes, Firebase (Remote Config, Crashlytics, FCM), Apple PushKit, APNs

Real-Time & SDK Integration: Agora SDK (video), Pusher (WebSockets)

App Store & Compliance: App Store deployment, Apple Human Interface Guidelines, App Store Guidelines, data privacy, jailbreak detection

Collaboration & Workflow: Git, GitHub, Bitbucket, Jira, Confluence, Figma, Agile/Scrum

AI-Driven Development: Claude Code, MCP (Model Context Protocol), AI-assisted coding, debugging & documentation workflows

PROFESSIONAL EXPERIENCE

Software Engineer — Star Connect Global Pty Ltd

Aug 2025 – Present

Dhaka, Bangladesh

- Architected and developed native iOS features using Swift and SwiftUI, translating Figma prototypes into responsive, production-ready interfaces.
- Integrated Agora SDK for real-time video calling and Pusher WebSockets for live messaging, improving responsiveness of core app features.
- Built background notification and call-handling capability with Apple PushKit, APNs, and Firebase Cloud Messaging (FCM).
- Managed environment configuration with Firebase Remote Config and multi-target builds via Xcode Schemes; monitored production stability with Crashlytics.
- Owned API integration and testing workflows using Postman and Hoppscotch, ensuring reliable client-server communication.
- Adopted an AI-driven workflow using Claude Code and MCP integrations to accelerate coding, debugging, and code quality.

Software Engineer — Softzino Technologies Ltd.

Nov 2022 – Jun 2025

Dhaka, Bangladesh

- Designed, built, and maintained modular native iOS applications in Swift, applying clean architecture principles and Apple's Human Interface and Accessibility Guidelines.
- Integrated RESTful APIs with secure authentication, structured error handling, and SSL pinning to protect data in transit.
- Managed App Store deployments end-to-end, including release updates, App Store Guidelines compliance, jailbreak detection, and data-privacy requirements.
- Led full-lifecycle testing, performance tuning, and debugging across devices and iOS versions to ensure a consistent user experience.
- Authored technical documentation for APIs and codebases, and used Git for version control while collaborating cross-functionally with designers and product managers.
- Engaged as an independent contractor embedded within Apple's internal developer teams, gaining first-hand insight into their engineering workflow and a deeper appreciation for security and inclusivity in software design.

KEY PROJECTS

Real-Time Video & Messaging iOS App — Star Connect Global

Native SwiftUI app combining Agora video calling with Pusher live messaging, PushKit/APNs call handling, and Firebase remote config & monitoring.

MyStore — Softzino Technologies

Internal iOS app for Apple Centre staff to run customer surveys, place orders, and generate store reports — a one-stop operational tool for daily centre tasks.

ART 4.0 — Softzino Technologies

Admin-facing iOS dashboard for Apple Centre administrators, consolidating store analytics and performance reporting into a single app.

Both apps were distributed internally via Apple's Self Service marketplace, accessible only through the AppleConnect VPN, rather than published to the public App Store.

EDUCATION

Bachelor of Science in Computer Science and Engineering — North South University

Jan 2017 – Dec 2022

Dhaka, Bangladesh • GPA: 3.40 / 4.00

A Levels — Mastermind School

Aug 2014 – Dec 2016

Dhaka, Bangladesh

LANGUAGES

English: Full Professional Proficiency (C2) **Bengali:** Native **Italian:** Intermediate (B2)
